Date: September 8, 2016

This is an archive of the HTML files and tklog file that is used for the Niwot Ridge US-NR1 AmeriFlux site logbook. These HTML files are links in the webcalendar which can be found here:

<http://urquell.colorado.edu/calendar/>

with the full logbook shown here:

http://urquell.colorado.edu/logbook/NIWOT_LOGBOOK.html

From the zip archive, the logbook can be viewed by using a web browser, such as:

firefox logbook/NIWOT_LOGBOOK.html

The raw logbook program (tklog) requires the packages TclX (<https://sourceforge.net/projects/tclx/>) and wishx

Here are installation instructions from Gordon:

From: Sean Burns <Sean.Burns@Colorado.EDU>
```

Hey Gordon,

thanks...worked perfectly...i put those tk files in:

```
/usr/local/PORTER/cuff/aster/util/tklog
```

and then copied over the old tklog files from the Sun computers into:

```
cp /usr/local/SOLARIS/aster/projects/NIWOT/logbook/tklog.log* ;  
   /usr/local/PORTER/cuff/aster/projects/NIWOT/logbook/
```

and now it seems to work just fine (sees all the old entries, etc)...thanks!

SpB.

Subject: tklog

Sean,

Copy /scr/tmp/maclean/tklog.tar.gz to russter.

Untar it where-ever you want. It will create a directory called tklog.

Do you usually run it via a "logbook" script? Generally that script sets the \$TKLOG_PATH to where ever your tklog.log file is.

If you have a logbook script, you may have to update it to run the new tklog/tklog which you just untar'd.

Hope this makes some sense, and works for you,

Gordon

This is the tklog software and the "logbook" script which starts up the lobook:

```
sburns 90336 Mar  4 2010 /home/staff/sburns/tklog.tar.gz
sburns 1104 Oct 23 2000 /usr/local/PORTER/cuff/aster/scripts/logbook*
```

HTML version of the logbook:

```
lrwxrwxrwx 1 sburns httpd      18 Feb 14 2010 index.html -> NIWOT_LOGBOOK.html
-rw-rw-r-- 1 sburns httpd 2370044 Mar  2 11:43 Logbook_Contents.html
