Histogram of discontinuity jumps when switching CPT $n = \pm 2$ to $n = \pm 3$ at sensor angles of approx. 62° during ascending nightside orbit segments.

Histogram of sign-changed discontinuity jumps when switching CPT $n = \pm 3$ to $n = \pm 2$ at sensor angles of approx. 58° during descending dayside orbit segments.

Histogram of discontinuity jumps when switching CPT $n = \pm 3$ to $n = \pm 2$ at sensor angles of approx. 122° during ascending nightside orbit segments.

Histogram of sign-changed discontinuity jumps when switching CPT $n = \pm 2$ to $n = \pm 3$ at sensor angles of approx. 118° during descending dayside orbit segments.
