

Interactive comment on “New analysis software for Viking Lander meteorological data” by O. Kemppinen et al.

O. Kemppinen et al.

osku.kemppinen@fmi.fi

Received and published: 25 October 2012

The referee raises a concern about the time table and availability of the software and its documentation.

As briefly explained in section 5: Summary and discussion, the software and the documentation will be available via a request to the authors after the data has been validated.
