

Interactive comment on “Optimal design of a climatological network: beyond practical considerations” by G. S. Mauger et al.

Anonymous Referee #1

Received and published: 31 May 2013

Once revised the manuscript, I think that the authors have done a good job of addressing my comments on the revision of this manuscript. Figures, tables and figure captions have been clarified in order to have better understanding the readers. Text has been also revised including most of the reviewer comments. Thus, the revised manuscript meets the high quality standards of GI. I agree with the current manuscript.
