Interactive comment on “Auroral all-sky camera calibration” by F. Sigernes et al.

F. Sigernes et al.

freds@unis.no

Received and published: 1 October 2014

Thanks for recognizing the novelty of combining 2 well known methods in calibrating all-sky cameras.

Minor corrections will be carried out as you suggest:

Pg 516, L23 is changed to: “The Fixed Imaging Compact Spectrograph (FICS) is mounted on a height adjustable table. The table can be moved on rails towards the Lambertian screen”

Pg 518, L15: border will be changed to threshold. “The spectral radiance is then below the threshold of...”

Pg 519, L14: Type mistake: “c” should indeed be subscript.

Table 2: We agree. The “Keo Alcor-RC aperture” label should be in line with the numbers. The table layout will be fixed.
