

## ***Interactive comment on “Protection against lightning on the geomagnetic observatory” by R. Čop et al.***

### **Anonymous Referee #1**

Received and published: 19 May 2014

OK, thank you for explanation. Nevertheless, it is not done to give in the paper the information freely available in internet. So, it would be good to concentrate on the original part of the paper and all other freely available information give as reference. Please, make corrections and send the corrected version for further referee process.
