Interactive comment on "Automatic segmentation and classification of seven-segment display digits on auroral images" *by* T. Savolainen et al.

Anonymous Referee #1

Received and published: 24 February 2016

General comments: the manuscript represent a substantial contribution to resolve a typical problem with old data archives. The aurthors' expearance is be useful for wide range of similar problems. The only suggestion for authors is to incorporate the obvious a priory information that the images are typically ordered in time with the the same time lag.
