

Interactive comment on “Automatic Georeferencing of Astronaut Auroral Photography” by Maik Riechert et al.

Anonymous Referee #3

Received and published: 29 April 2016

The paper describes the methodology developed to make available georeferenced auroral images taken from the ISS. I found the paper to be well written. The material covered has value to complete direct aurora imaging from ground for studying the large scale behavior of the solar wind-magnetosphere-ionosphere system. It deserves publication.
