

Interactive comment on “GPR and IRT Tests in two Historical Buildings in Gravina in Puglia” by Loredana Matera et al.

Anonymous Referee #1

Received and published: 26 July 2016

The paper is almost ready for the publication but it is necessary still to work on the section 5 regarding IRT results. It is not clear what is the correlation and the added value provided by IRT with respect to the GPR measurements. At present, section 5 does not appear well linked to the other sections of the manuscript.
