Interactive comment on "The abandoned surface mining sites in Czech Republic: Mapping and creating the database with GIS web application" *by* R. Pokorný and M. T. Peterková

O. Holasek

oldrich.holasek@geology.cz

Received and published: 15 February 2016

The intention to convert the complete book series "The Quarry Inventory" into the digital form is respectable and very helpful. It is well, that the authors summarized the history of quarry mapping and also the process of the database creating into the scientific article in the GI journal.

The manuscript is concise and clearly arranged. I welcome especially the complete summary of references of the all published Quarry Inventories volumes.

For the formal aspect of the manuscript I have one small suggestion – I miss the link to the Fig. 2 and 3 in the text. On page 3, line 32 Fig. 3 is probably meant Fig. 5.
