"The Magnetic Observatory on Tatuoca, Belém, Brazil: History and Recent Developments"

Morschhauser Achim, Brando Soares Gabriel, Haseloff Jürgen, Bronkalla Oliver, Protásio José, Pinheiro Katia, and Matzka Jürgen

The paper is a nice description of the history of Vassouras Magnetic Observatory. The references are quiet broad of the whole information involved with this observatory.

A few comments on special details:

Page 1. Row13: correction for (195, 1955)
Page 2. Row11: Better use History than Story
Page 3, Row 11: Should be Edinburgh
Page 3, Row 25: Confusing text
Google, should be in references
Page 4, Row 2: Is not clear the "with Circle" position, at least should be the number of the figure
Page 4, Row 9: Reference (Newitt et al., 1996) should be without page numbers, there are other examples
Page 5, Row 6, bad redaction "and one technician and"
Page 10, Row 9. Lack of parenthesis
Page 15, Row 1. Wrong reference Format.

Sincerely E. Hernández Quintero
