

Interactive comment on “USGS Experience with the Residual Absolutes Method” by E. William Worthington and Jurgen Matzka

E. William Worthington and Jurgen Matzka

bworth@usgs.gov

Received and published: 14 July 2017

Comment A was addressed and the phrase about Deadhorse was removed.

Comment B. The suggested point 3 is addressed in the conclusions.

Comment C is the same as Pedersen’s page 5 comment and has been addressed.

Comment D is the same as Pedersen’s page 7 comment and has been addressed. Figure 1. and further text was added to address this.

Comment E is similar to Pedersen’s page 9 comment. We presented the parameters for the residual method (Figure 2) but we do not compute the parameters for the null method.

C1

Comment F. This is a very important comment, however we feel it is beyond the scope of this paper and should be addressed separately.
