Received and published: 30 January 2018

1. Referee comments:

Changes suggested by Anonymous referee #2:

(i) In Figure 2, (left) mode 4 cannot be seen. Is too close to the horizontal axis

(ii) In Figure 4, modes different from mode 0 cannot be seen since they are close to the horizontal axis. Please, consider the possibility of adjusting the vertical axis as done in

figure 6.

Changes suggested by Anonymous referee #3: none.

2. Author's response: the suggestions of referee #2 have been incorporated, with Figures 2 and 4 modified accordingly. This was done even before the paper was uploaded to GI Discussions, and has been noted by Anonymous referee #3.

3. Author's changes in manuscript: figures 2 and 4 modified as above.
