Thank you very much for your comments on my article and for the recognition and encouragement of my work.(1)As you said,the definition of dynamic range is basic,and it's superfluous in the article.So I have deleted the definitoin.(2)I have removed Figure 12 to avoid repeatability because the Figure 11 has shown the test result of channel crosstalk.(3)I have read the manuscript again carefully to avoid missed spelling mistakes.Thanks again for your suggestions.
