We would like to thank the reviewers for their constructive comments. The following changes have been made to address them.

In response to referee 1 We have re-organized the introduction as suggested, moving a section on the evolution of ocean mapping technology to an earlier point in the manuscript. We have also made the other recommended edits.

In response to referee 2.

We have moved a section that begins the description of GGGS from the Introduction to the beginning of section 2. We have also fixed the paragraph numbering problem that was noted.

In addition we have made a number of small edits to fix problems in the manuscript and we have updated the area of the ocean floor that has been mapped (to 19%) to reflect recently released data.
