Received and published: 18 August 2020

The paper is interesting for geophysicists dealing with GPR. There are figures of good quality. The reference list is composed of all articles mentioned in the text. Figures are of good quality English is of poor quality. I sure the text should be subjected to the thorough English language edition either by professional English editor or by colleague fluently speaking English. Maybe after edition some unclear sentences will be improved and understandable. I uploaded my denotes with pdf manuscript My opinion, the article must be published after language edition
