

Interactive comment on “Day- and night-time aerosol optical depth implementation in CÆLIS” by Ramiro González et al.

Anonymous Referee #2

Received and published: 25 August 2020

This paper presents a newly developed software tool for analyzing the AERONET data and providing AOD. This tool is robust and can be used on all the AERONET data. The paper clearly describes the software tool and is well organized. The many steps involved are clearly explained as well as the validation procedures.
