

Interactive comment on “Magnetic interference mapping of four types of unmanned aircraft systems intended for aeromagnetic surveying” by Loughlin E. Tuck et al.

Anonymous Referee #2

Received and published: 28 January 2021

General comments

A very well drafted manuscript. It provides a good and detailed guide for those who would like to develop a lightweight UAV-borne aeromagnetometry system.

Specific comments

1. The caption of Figure 2, what are the magnetometer computer and the fluxgate computer? I know What they are for. But a bit confusing.
